

JULY

mid-season magic

S	M	T	W	T	F	S
28	29	30	1	2	3	4 JULY 4TH
 BEAT THE HEAT: Water early in the morning to conserve water and prevent disease.				 Leave water sources out for pollinators and birds.	 Refresh bird baths on the regular.	
5	6	7	8	9	10	11
 Mulch to conserve moisture.		 Check containers and hanging baskets daily to avoid drying out.	WATCH OUT FOR PESTS & DISEASE:  Check cucurbits for powdery mildew, treat as needed.			
12	13	14	15	16	17	18
 Look out for Japanese Beetles - install traps or remove manually into soapy water.		 Fertilize tomatoes with a calcium rich fertilizer (Tomato Tone) to avoid blossom end rot.	GIVE YOUR GARDEN A BOOST:  Deadhead spent blooms to encourage reblooming.			
19	20	21	22	23	24	25
 Pinch, trim, and use herbs to keep from going to seed.	 Continue to fertilize annuals, hanging baskets, and container gardens.		 Plant mid-season bloomers like monarda, echinacea, lilies.	INDOOR PLANT TLC: Increase watering with warmer temps and longer days. 		
26	27	28	29	30	31	1
 Wipe down leaves and check for insect such as spider mites and mealy bugs.		 Summer is a great time to repot indoor plants, use new Tonka Terra Indoor Potting Mix or Cactus Potting Mix!
