

HOUSEPLANT

repotting guide

Gently loosen roots to promote growth

Choose a pot with drainage to prevent root rot

Pots with matching saucers protect surfaces in style

Bump up diameter 1-2 inches when repotting

Match potting soil to plant type (or mix your own!)

Use a grower's pot + drop-in for planters without drainage

Add soil-toppers to add a finish and prevent fungus gnats

Glazed pots for tropical, moisture-loving plants

Terra cotta for cacti, succulents, + hoya
