

RAISED GARDEN BEDS

Tonkadale's guide for success

Fill with TonkaTerra, our house blend potting soil. Use 1 bag per cubic foot. (length x width x height)

Fertilize with Espoma's Organic Garden Tone when planting, then monthly throughout the growing season.

Plant in rows or grids to maximize space.

Line with newspaper to cover grass and weeds.

Soil depth should be 12"-18" for veggies, 6" for herbs and leafy greens.

Add supports for climbing and vining plants to maximize space and for ease of harvest.

Water close to the soil to avoid fungal infections and to maximize absorption.
